Analysis of T7 Ribomax™ Express-generated in vitro transcripts. In vitro transcribed RNAs were visualized by agarose (1%) gel electrophoresis in 1X TBE/0.1% SDS buffer and subsequent ethidium bromide staining. Each lane contains 1µg of RNA resulting from in vitro transcription reactions incubated for the indicated time periods. Professional requirements for architects vary from place to place, but usually consist of three elements: a university degree or advanced education, a period of internship or training in an office, and examination for registration with a jurisdiction.. Professionals engaged in the design and supervision of construction projects prior to the late 19th century were not necessarily trained ... B. Agarose gel analysis of 5' RACE products for various RNA targets using the NEB Template Switching RT Enzyme Mix 5' RACE protocol (left) or Clontech SMARTer 5/3' RACE Kit (right). Input included 1 µg of Jurkat total RNA, 10 pg of 8 kb synthetic RNA and 10 ng of ERCC RNA Mix 1 to evaluate the performance as a function of transcript length and copy number.
